

Name: Knackery

Waste type: Blood, fats and general waste from wash down of kill floor.

Problems:

1. On site waste water system consisting of 3 tanks in series creating odour within Knackery.
2. Odour in irrigation water creating complaints from housing estate.
3. Irrigation blockages from solids in water.

Solution:

1. Install air stone aeration in first tank and dose with For Earth Bio Plus.
2. Automatic dosing of For Earth Odour Kill directly into irrigation line.

Results:

1. No odour within Knackery work area.
2. Irrigation water: considerable reduced odour levels and no complaints from neighbours since installation.
3. Irrigation heads no longer blocking.

Tank aeration & Bio Plus

Automatic dosing of Odour Kill into irrigation line
